One of the most modern ways to display your photographs or artwork.

Let the photograph be the focal point, not the frame. Choose from our online gallery designs or upload your own image and we will place it inside one of our exceptional displays.

The acrylic mounts are made with two highly polished acrylic panels with satin chrome wall mountings, giving depth to the presentation of the artwork. These very modern clear frames are also very popular for art displays as they do not distract the eye from the artwork.
